Valley

Come check out our exciting social group program!

Adaptations Lehigh Valley is a program for adults in their 20s and 30s with developmental and/or learning disabilities, who have a high level of independence. Our program is a place for individuals of all backgrounds to socialize, learn, grow, and build friendships with one another. This program

provides participants with opportunities to experience the community through various social and recreational activities. Participants also have an opportunity to foster independence in our monthly learning workshops.
