

## **CLIU BrainSTEPS Team**

### **Mission Statement**

**Our mission is to act as a clearinghouse, providing information and training to all stakeholders (family, school staff, outside service providers, the community at large) in preparation for a student's re-entry to school after a brain injury or when the student faces a transition in his educational process.**

**Further, members of the BrainSTEPS team value equitable consultation to all stakeholders. The team will not engage in activities which could create a conflict of interest with our professional roles.**
